Technical Skills

Languages: HTML, CSS, TypeScript, Java, Javascript.
Frontend: React.js, Redux, Next.js, Tailwind, Material UI, ShadCN, Framer Motion.
Backend: Node.js, Express.js, MongoDB, SQL, Prisma, PostgreSQL, AWS.
Concepts: REST APIs, Object Oriented Programing, Databases, Software Development Life Cycle, Serverless Architecture.

Projects

CryptoTracker | *React, Material UI, Framer Motion, Chart.js*   ***Github Demo***
- A Crypto tracker web app that monitors the status of over **100 crypto currencies** with an intuitive design and provides accurate data of current prices of those crypto currencies.
- Integrated Coin Gecko Api with **99% request success rate**.
- Enhanced user engagement by incorporating interactive animation using **Framer Motion Library**.
- Utilized Chart.js to visualize complex crypto currency trends provides user in depth data insights.

Video Streaming Backend | *Node.js, Express.js, Jwt, MongoDB, Multer, Cloudinary,*   ***Github***
- Developed a robust and scalable backend for a YouTube-like application, focusing on user authentication, media uploads and user profile data management
- Implemented JWT **authentication** providing **access and refresh tokens** for secure user sessions.
- Integrated **Image** and **video upload** functionality using multer and Cloudinary
- Enhanced Backend performance utilizing **MongoDB aggregates** and **Pipelines** to fetch user profile data.

Music Maestro | *Next.js, Acertinity UI, Shadcn*   ***Github Demo***
- Developed a Modern Landing Page for a music course selling website with modern design and animations using Next.js showcasing the integration of **modern UI component** libraries and responsive design techniques.
- Achieved a sleek and contemporary design and **modern animation**, aligning with current web design trends to attract and retain users.

Education

Dr. J. J. Magdum College of Engineering, Jaysingpur   Aug 2016 - Mar 2022
Bachelors in Mechanical Engineering (Percentage: 75 %)   *Kolhapur, Maharashtra*

Traning /Experience

AccioJob   Jan 2023 – Present
Full Stack Web Developer Trainee   *Gurugram, Haryana*
- Completed over 900+ hours of Training in Frontend as well as Backend Development with a focus on latest Tech Stack and achieved proficiency in Reac.js Node.js Redux Tailwind MongoDB and other Backend and Databases.
- Led the development and implementation of several significant projects including frontend and backend part which improved my project delivery speed by 30%.
- Utilized Tools like tailwind and Component libraries like ShadCn and MaterialUI to make Standard and Mobile Responsive Interfaces
- Gained Knowledge of Serverless Architechture and Amazon AWS for efficient deploying of backend services.

Soft Skills

Skills: Teamwork and collaboration and ability to adapt to new tools and technologies quickly.
Languages: English, Hindi, Marathi.
